

# **Course Description**

## **Course Title: Public Speaking, Debate, and TEDx Talk**

Want to become a confident speaker, a quick thinker, excel at School and develop leadership communication skill? This fun and interactive course is all about helping students in grades 6–11 build strong public speaking and debate skills in a relaxed, supportive setting.

Students will learn how to speak clearly, think on their feet, and present their ideas with confidence—whether it’s for a class presentation, a student leadership role, or even a school debate or speech competition. Best of all, students will have the chance to prepare for and possibly present at our school’s TEDx Student Talk event in May!

This course is great for all levels, from total beginners to experienced speakers. It’s taught in a peer-led workshop style, so everyone can learn at their own pace. Beginners can watch and learn from advanced students, while experienced speakers can team up with others at their level to push themselves further.

If you’re looking to grow your confidence, improve your communication skills, and have fun doing it—this is the course for you!
